REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and computer program product, tangibly stored on a computer-readable medium, for flattening an image. The closest prior art, Sandrew (USPN 5,534,915) shows a similar system, in which, a method for color enhancing an image comprised of a plurality of pixels representing gray-scale values by selecting a region of the image for which color is to be applied, wherein at least two base colors are selected which will divide the color attributes of the region into at least two sub-regions. However, Sandrew fails to address: "wherein defining a planar-mapping outline for each object, the planar-mapping outline of each selected object being an enclosing outline that encloses the object, and the planar-mapping outline of each object not selected being the original outline of the object and using the planar-mapping outlines of all the objects to divide the image into non-overlapping regions". This distinct feature has been added to all independent claims and renders them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
